

Axxam's Diverse Library: AXX^{DIV2.0}

Axxam is proud to offer an entirely **new generation screening collection: AXX^{DIV2.0}** composed of **240.000** carefully selected compounds.

The selection of the compounds was guided by our **long lasting screening expertise** and significant input from our team of **medicinal and computational chemists**.

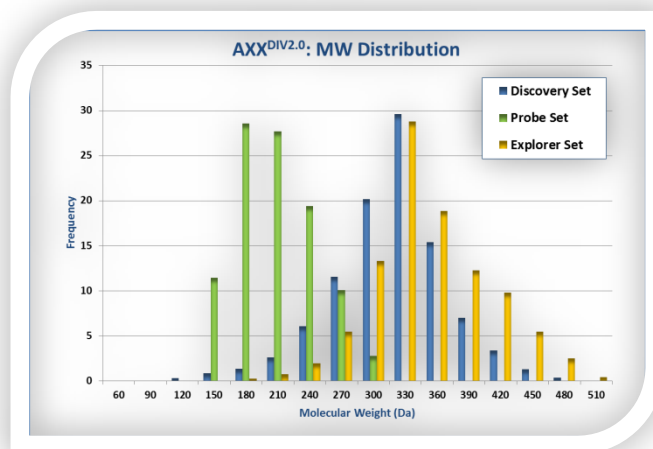

AXX^{DIV2.0} Composition

In order to address the different needs of our customers the new screening collection **AXX^{DIV2.0}** is composed of **three different subsets**

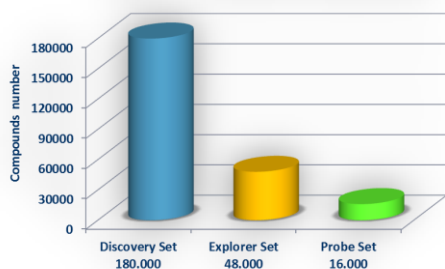

DISCOVERY SET: 180.000 compounds providing a scaffold based approach

EXPLORER SET: 48.000 compounds ensuring highest chemical diversity

PROBE SET: 12.000 compounds covering the fragment-like space

AXX^{DIV2.0}: Subsets Composition

AXX^{DIV2.0}: HIGHLIGHTS

- HIGH NOVELTY:** compounds have not been on the market for more than 3 years
- HIGH QUALITY:** multiple filters applied to exclude unwanted features
- HIGH FLEXIBILITY:** subsets can be accessed independently
- HIGH SPEED:** building blocks for all the compounds are available through our provider to speed up hit expansion and optimization process
